*Building knowledge that helps empower smallholder farmers in the developing world to create a secure, self-reliant and prosperous future for their families and communities.*

The **Feed the Future Innovation Lab for Assets and Market Access** (AMA Innovation Lab) at UC Davis conducts and supports research on policies and programs designed to help poor and smallholder farmers in the developing world to manage risk, adopt productive technologies and take an active part in economic growth.

To ensure the broadest impact, we regularly host and sponsor outreach events globally and translate our research into accessible formats that integrate our findings for governments, NGOs and others working to increase prosperity worldwide. Our work is funded by USAID to support the U.S. Government's Global Hunger and Food Security Initiative. *Learn more at <http://basis.ucdavis.edu>.*
